

Technical data sheet

Modulating rotary actuator with fail-safe for ball valves

- Torque motor 10 Nm
- Nominal voltage AC/DC 24 V
- Control modulating 2...10 V
- Position feedback 2...10 V
- Deenergised closed (NC)
- with 2 integrated auxiliary switches

Technical data

Nominal voltage	AC/DC 24 V
Nominal voltage frequency	50/60 Hz
Nominal voltage range	AC 19.228.8 V / DC 21.628.8 V
Power consumption in operation	3.5 W
Power consumption in rest position	2.5 W
Power consumption for wire sizing	6 VA
Auxiliary switch	2 x SPDT, 1 x 10% / 1 x 1190%
Switching capacity auxiliary switch	1 mA3 A (0.5 A inductive), AC 250 V
Connection supply / control	Cable 1 m, 4 x 0.75 mm ²
Connection auxiliary switch	Cable 1 m, 6 x 0.75 mm²
Parallel operation	Yes (note the performance data)
Torque motor	10 Nm
Torque fail-safe	10 Nm
Operating range Y	210 V
Input Impedance	100 kΩ
Position feedback U	210 V
Position feedback U note	Max. 0.5 mA
Position accuracy	±5%
Direction of motion motor	Y = 0 (0 V = A – AB = 0%)
Direction of motion fail-safe	Deenergised NC, valve closed (A – AB = 0%)
Manual override	by means of hand crank and locking switch
Running time motor	90 s / 90°
Running time fail-safe	<20 s @ -2050°C / <60 s @ -30°C
Sound power level, motor	45 dB(A)
Position indication	Mechanical
Service life	Min. 60'000 fail-safe positions
Protection class IEC/EN	III, Safety Extra-Low Voltage (SELV)
Power source UL	Class 2 Supply
Protection class auxiliary switch IEC/EN	II, reinforced insulation
Degree of protection IEC/EN	IP54
Degree of protection NEMA/UL	NEMA 2
Enclosure	UL Enclosure Type 2
EMC	CE according to 2014/30/EU
Low voltage directive	CE according to 2014/35/EU
Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14
UL Approval	cULus according to UL60730-1A, UL60730-2-14 and CAN/CSA E60730-1
	The UL marking on the actuator depends on the production site, the device is UL-compliant in any case

Technical data sheet

NRF24A-SR-S2

Mode of operation	Type 1.AA.B
Rated impulse voltage supply / control	0.8 kV
Rated impulse voltage auxiliary switch	2.5 kV
Pollution degree	3
Ambient humidity	Max. 95% RH, non-condensing
Ambient temperature	-3050°C [-22122°F]
Storage temperature	-4080°C [-40176°F]
Servicing	maintenance-free
Weight	2.2 kg
	Rated impulse voltage supply / control Rated impulse voltage auxiliary switch Pollution degree Ambient humidity Ambient temperature Storage temperature Servicing

Safety notes

- This device has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Outdoor application: only possible in case that no (sea) water, snow, ice, insolation or aggressive gases interfere directly with the device and that it is ensured that the ambient conditions remain within the thresholds according to the data sheet at any time.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- Cables must not be removed from the device.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.
- The two switches integrated in the actuator are to be operated either on power supply voltage or at safety extra-low voltage. The combination power supply voltage/safety extra-low voltage is not permitted.

Product features	
Mode of operation	The actuator is connected with a standard control signal 010 V. The actuator moves the valve to the operating position at the same time as tensioning the return spring. The valve is turned back to the fail-safe position by spring force when the supply voltage is interrupted.
Simple direct mounting	Simple direct mounting on the ball valve with only one screw. The mounting orientation in relation to the ball valve can be selected in 90° steps.
Manual override	By using the hand crank the valve can be operated manually and engaged with the locking switch at any position. Unlocking is carried out manually or automatically by applying the operating voltage.
Adjustable angle of rotation	Adjustable angle of rotation with mechanical end stops.
High functional reliability	The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached.
Flexible signalling	The actuator has one auxiliary switch with a fixed setting and one adjustable auxiliary switch. They permit a 10% or 1190% angle of rotation to be signaled.
Electrical installation	

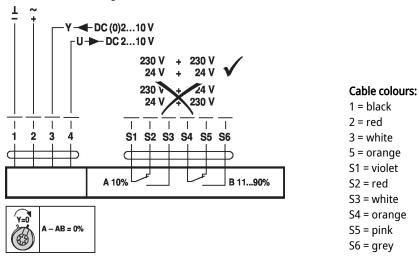

Supply from isolating transformer.

Parallel connection of other actuators possible. Observe the performance data.
